Medplum / Engineering

Clinic staff needed to see what had changed in a patient record. I'd like to explore how an API-first health record can expose that history to the person actually doing intake.

H3 Clinic / Intake software

Worked with six nurses to digitize intake and vital signs. Built edit history and read-aloud text, and helped staff learn the system during clinic operations.

NeuroLight / VOCO OS

Built a platform connecting Bluetooth Low Energy and Wi-Fi devices to one computer for EEG processing trials. Dr. Anupam Kumar at Vanderbilt’s Wond’ry mentored me and uses the platform.

NC State Lin Lab / Computational research

Contributed to protein-DNA binding research and developed NeuroIDEA to study TCF4 in Pitt-Hopkins syndrome. Presented NeuroIDEA at the Society for Neuroscience annual meeting.

Education

Panther Creek High School, expected June 2027. Dual enrollment at Wake Technical Community College, including linear algebra and differential equations.
